

AD-900S OMNI-DIRECTIONAL ANTENNA 6 dB GAIN

This omni-directional antenna is a perfect match for 900 UHF transmitters or receivers. It covers the frequency range from 902 MHz - 940 MHz. This antennas has 6 dB gain and 50 ohms impedance.

Technical Specifications	
Operating Frequency:	902-940 MHz
Impedance:	50 ohms
Temperature Range:	-40 +85* C
Diameter:	1.3"
Polarization:	Vertical
Connector:	Integral N – female
Max. input power:	150 W
Weight:	2.4 lbs.
VSWR:	< 1.5:1 avg.
Gain:	6 dBi
Length:	23.6"
Radome material:	White fiber glass
Mounting:	31.7 mm to 50.8 mm dia.
Rated wind velocity:	108 MPH
