
CH-30A

SMALLEST VIDEO TRANSMITTER CH 30 UHF

This transmitter is designed for experiments or video-surveillance. It uses fundamental oscillator frequency for broadcast TV CH 30 UHF. This little transmitter is just amazing. It will give you a broadcast quality picture up to 500 ft under ideal conditions! It measures only 0.8 X 0.6 X 0.2 inches. The transmitter is fully crystal controlled! This unit will accept any video-signal NTSC, PAL or SECAM. The modulation is true AM. It uses a 9 V battery. This Design is just perfect; the video Transmitter will give you an Amazing B&W or Color picture. You can pick-up the signal using any kind of TV set tuned at CH 30 UHF. For the best results you can use an amplified TV antenna from Radio Shack. The best unit for reception was Casio TV set EV-660 or any small TV set with an LCD display made by Casio or Sonny! Just simply hookup the transmitter to any video camera. It is great for your cottage, beach house or even car or any kind of video-surveillance. It is also available a special design for CH 48 UHF

Technical Specifications	
BATTERY OPERATED	9 V-12 V
TV SYSTEMS	NTSC, PAL or SECAM
CURRENT CONSUMPTION	36 mA/9V
VIDEO SIGNAL	1V, 75 ohm
LOW HARMONICS	
CRYSTAL CONTROLLED	
SMALLEST SIZE	0.8" X 0.6" X 0.2"
FREQUENCY	567.25 MHz
RANGE	UP TO 600 ft
WEATHERPROOF	
ANTENNA	BUILT-IN
HIGH DURABILITY	
CONNECTOR	RCA MALE
REVERSE POLARITY PROTECTED	
ULTRA THIN	
TEMPERATURE RANGE	-20 +60* C
PICTURE	HIGH-QUALITY
AUDIO	NO
