

DX-5 WORLD'S SMALLEST VIDEO TRANSMITTER 1900 MHz

This is an ultra compact transmitter capable of sending outstanding quality video images wirelessly in the 1900 MHz frequency range. It has attached hardwired antenna and works on watch batteries. Its **absolutely world's small size** makes it a particularly good choice for use in security applications and medical research. Dimensions: 0.25" X 0.15" X 0.25".

Technical Specifications	
Operating Frequency:	1980 MHz
Power output:	< 1 mW
Temperature Range:	-5 +35* C
Dimensions:	0.25" X 0.15" X 0.25"
Antenna:	Attached
DC power:	3.6 -8 V
Video input:	1 V
Frequency stability:	± 250 kHz
Weight:	0.5 grams
Low Current consumption:	8 mA / 5 V
