

# XLS- 1800/HPR 8 CHANNELS MICROWAVE LINK FOR 1.7 GHz

### **Recommended for Government agencies**

Extreme range: 100 W transmitter with 8 channel receiver, 2 special antennas 9.5 dB gain PT-1700, Capacity: 1 video/2 audio channels. Operating frequency: synthesized. This link is Professional and it is recommended for special applications or video surveillance. It is made for long distances - up to 15 km line-of-sight. Frequency setting is internal.

#### Export restricted

| Technical Specifications | XLS-1800/HPR Transmitter |
|--------------------------|--------------------------|
| -                        |                          |
| Operating Frequency      | 1700 MHz-1800 MHz        |
| Channels                 | 8 channels               |
| Channel Selection        | DIP- Switches            |
| DC Voltage               | 12 V                     |
| RF output power          | 100 W                    |
| Minimum required voltage | 24 V                     |
| Battery Power            | 24.6 V /                 |
| Frequency stability      | 0.005%                   |
| Video distortion         | 1%                       |
| Maximum Range            | App. 150 miles           |
| Video format             | NSCT, PAL                |
| Current Consumption      | 10 A                     |
| Antenna                  | Directional              |
| Impedance                | 50 ohms                  |
| Video connector          | BNC                      |
| Video level              | 1 V                      |
| Video impedance          | 75 ohms                  |
| Audio frequency response | 20 Hz – 20 kHz           |
| Audio input              | 300 mV                   |
| Audio carrier frequency  | 6 MHz                    |
| Temperature Range        | -40+75 °C                |
| Dimensions               | 7.5" x 11" x 3.5"        |
| Weight                   | 16 lb                    |
| Modulation               | WFM                      |

| Modulation               | WFM                    |
| Antenna connector        | SMA                    |

#### Powerup

At powerup, the unit will retrieve the last used channel, program the PLL with this channel, and display the channel by blinking the LED the same number as the channel number.

## **Displaying Current Channel**

Push button is located on the top of the unit. To display the current channel, press the pushbutton once and release. The current channel will blink. After approx. 5 seconds, the current channel will again blink.

## **Changing to a New Channel**

To change to a new channel, press the pushbutton once and release. The current channel will blink. Press and release the pushbutton again **before** 5 seconds has elapsed and the channel will increment by 1 and the LED will blink the new channel. Repeat this step until the desired channel is reached, waiting for the blinking to stop each time before pressing the button again. **Once your desired channel is reached, wait 5 seconds until the LED again blinks your desired channel. Your new channel is now saved in memory.** 

#### Warning

Our microwave links are built in weatherproof boxes, but they are not waterproof. Please make sure to protect transmitter/receiver boxes from the rain and moisture.
